(54) Title: WORK IDENTIFICATION SYSTEM AND SIGNATURE MANAGEMENT SYSTEM

(57) Abstract: A work identification system comprises a work storage configured to store digital data representing at least one of a shape, area, and color of an only one work, a collation section configured to calculate a degree of deviation between digital data representing at least one of a shape, area, and color of a target work to be identified and the digital data stored in the work storage, and a test section configured to perform a test of hypothesis based on a predetermined hypothesis using the degree of deviation.
